HP Compaq Elite 8300 Business PC

Enjoy elite quality and reliability

Performance and efficiency for business

The HP Compaq Elite 8300 Business PC, part of HP’s professional line of business PCs, boasts outstanding performance and quality with no compromises. The HP Compaq Elite 8300 is eco-friendly and gives you the most choice and expandability with all the manageability features you need.

The HP Compaq Elite 8300 Business PC provides premier performance and reliability designed for all of your corporate applications. Intel’s new third-generation Core™ processor¹ and graphics technologies deliver new levels of performance in graphics and CPU. IT Managers will appreciate the stability and long lifecycle assurance as well as the latest security and remote management technologies and solutions. With the broadest selection of form factors and configurability options, the HP Compaq 8300 Business PC meets your business needs.

Enjoy elite quality and reliability

Thanks to over 115,000 hours of diverse testing, the HP Elite 8300 Business PC is a durable, reliable product. It is easy to access major components with the tool-less hood removal, tool-less drive bays and slots. Fix problems in a snap with the quick release latches, green pull tabs, and color-coordinated cables and connectors inside this elite PC.

HP recommends Windows® 7.

Protect data, access, and communication.

Every organization needs reliable ways to protect business data, safeguard personal information, and non-authorized access. HP ProtectTools provides a best-in-class suite of security technologies. The custom HP BIOS is designed with leading security, serviceability, deployment and manageability features, and the HP Compaq Elite 8300 comes with a certified TPM (Trusted Platform Module).

Choose the form factor to fit the business.

The HP Compaq Elite 8300 Business PC offers three form factors. Choose from the compact Ultra-Slim Desktop (USDT), the expandable Convertible Minitower (CMT), and a practical, space-saving Small Form Factor (SFF).

Save on IT costs, and save yourself legwork by reducing deskside visits.

HP Business PCs optimized with Intel® Core™ i5 vPro Processor Technology deliver integrated, professional-grade remote manageability and security solutions that enable you to confidently manage your PCs, all from the IT management console.

Get break-through, next-generation performance.

Choose from the next level in fast, multi-core performance with third generation Intel® Core™ i5 and i7 processors¹ to meet the toughest demands.

1. Multi-Core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. 64-bit computing on Intel® architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers, and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel® 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations.

2. Some functionality of this technology, such as Intel® Active management technology and Intel Virtualization technology, requires additional 3rd party software in order to run. Availability of future “virtual appliances” applications for Intel vPro technology is dependent on 3rd party software providers. Microsoft Windows required.
